Dear Parent

We understand how difficult the current period is for families trying to juggle work commitments, child care and the online learning process. With this in mind we have a few pointers that may help:

1. Keep a routine with the children each day getting up, getting dressed and following a daily schedule as suggested by your class teacher.
2. Connect to Seesaw where and when possible but understand your child's teacher is having to respond to work posted by 30 other children at the same time.
3. Complete the work posted by the class teacher where possible.
4. Don't stress and panic if all the work is not completed. These are not normal times.
5. We would all prefer to have the children in school engaging in normal school life within our school environment, however we also understand the need to have the minimum number of people in school to reduce the transmission of the virus.

Finally, we want to emphasise that we are here to support all the children and parents through this time of home learning and will do everything we can to make it as manageable as possible.

Kind regards

J Manning
